iWS™

At P&L Waste Management Software, working with customers to improve our products is one of the most exciting parts of the business.

Integrated Waste System (IWS) is our premium product, a software system used by most of the UK's major commercial waste management operations and public sector customers – as well as many others worldwide. We are proud to announce the new version – IWS6™.

The Integrated Waste System (IWS) comprises a suite of software modules with specialist features which, added to a core system, provides reporting and predefined procedural routines of the particular waste operation.

The UK's leading waste management software:

- > Used by private commercial and public sector waste management organisations
- > Windows®- based interface
- > Integrates with other popular office software
- > Built-in text translation feature allows easy set-up for individual interfaces in local language and terminology
- > Modular – grows with your operation's needs
- > Specialist operations such as recycling and brokerage
- > Maintained fully legislation and regulation compliant
- > Inspected by UK HM Customs and Excise
- > Authorised by European Regulation Authorities
- > Landfill tax definitions, tax periods and accumulated tax calculations
- > 24/7 technical support Hotline
- > Full Annual Maintenance contracts available
- > On- or off-site operator training available
- > The product of choice for many large organisations around the world

New features of IWS6™:

- > New Look and Layout – everything is menu driven
- > Exiting data entry dialogs – check if any fields have been updated before exiting
- > Removal of conditional indexes (SQL Only)
- > New Help File Formats
- > Automatic updates – automatically updates version 6 software, images and help files
- > Comprehensive Address Book
